Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Color photographs and color drawings are not accepted unless a petition filed under 37 CFR 1.84(a)(2) is granted. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and, unless already present, an amendment to include the following language as the first paragraph of the brief description of the drawings section of the specification:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings and black and white photographs have been satisfied. See 37 CFR 1.84(b)(2).

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the examiner cannot see all of the element because some of them are blurr by the photograph. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Art Unit: 3723

1. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The invention appears to be claiming the workpiece which is not part of the invention. In claim 19.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 20-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Newbould (6874773).

Newbould discloses a multi axis chuck device having a first portion (2&6), a second portion (1), a third portion (9) which are all rotatable connected.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3723

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2- 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newbould (6974773) in view of Prochac (6427993).

- a. Newbould is discussed above.
- b. Newbould does not disclose scales indicating the degree of freedom.
- c. Prochac discloses a holding device having a scales indicating markings on the apparatus so the measurements can help align the workpiece or workpieces.
- d. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Newbould device by providing scale indication markings as taught by Prochac so that apparatus the measures the alignment the workpiece or workpieces.

5. Claims 24-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Floren (3273879) in view of Taniguchi et al (4492356).

- e. Floren teaches a method rotating a multi axis chuck to various position and repositioning.
- f. Floren does not disclose a motor having a controller with a sensor.
- g. Taniguchi et al teach a method multi axis chuck having a motor (8) and controller (34) with a sensor (30) which allows for automatic positioning of the workpiece .
- h. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Floren device by replacing the

hand crank with a motor and controller as taught by which allows for automatic positioning of the workpiece .

i. et al which allows for automatic positioning of the workpiece .

6.

Allowable Subject Matter

7. Claims 11-18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahashi discloses an invention.
